SUMMARY

Full Stack Developer with hands-on experience building web and mobile applications using React.js, TypeScript, Node.js, ASP.NET Core, Flutter, PostgreSQL, and Supabase. Built full-stack projects including an enterprise logistics and financial ERP, an industrial IoT monitoring dashboard, an AI retinal diagnostics tool, a mobile baby-cry analysis application, and an AI chatbot. Experienced with authentication, role-based access control (RBAC), REST APIs, database workflows, Git, GitHub, Docker, and real-time application integrations.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Redux, Tailwind CSS, Shadcn/UI, HTML5, CSS3

Backend: Node.js, Express.js, ASP.NET Core, REST APIs, JWT, Authentication & Authorization

Database: PostgreSQL, Supabase, MySQL, MongoDB (basics)

Mobile: Flutter, Dart

IoT / Integration: MQTT, EMQX, Industrial IoT, API Integration

Tools: Git, GitHub, Docker, Postman, Vercel

SELECTED PROJECTS

NOVA Dashboard System | React.js, TypeScript, ASP.NET Core, PostgreSQL, Docker, MQTT, EMQX

Industrial IoT monitoring dashboard for cold-room operations, designed to work above existing PLC/SCADA systems.

- Built a React + TypeScript dashboard architecture connected to an ASP.NET Core backend and PostgreSQL.
- Implemented JWT authentication, role-based access control (RBAC), multi-tenant data handling, and audit-oriented workflows.
- Integrated MQTT/EMQX concepts for gateway-to-backend telemetry and real-time industrial data flows.
- Designed monitoring views for temperature, humidity, equipment status, alarms, trends, and factory/room organization.

Enterprise Logistics & Financial ERP System | React, TypeScript, Tailwind CSS, Shadcn/UI, TanStack Query, Zod, Supabase, PostgreSQL

Integrated ERP dashboard for logistics companies with role-based access, wallet management, financial transactions, and operational workflows.

- Built frontend and backend features for logistics, financial, user-management, and support workflows.
- Implemented authentication and RBAC for different user roles and access levels.
- Automated financial business logic using PostgreSQL triggers and maintained transaction/audit flows.
- Implemented real-time notifications and data-driven dashboards using Supabase.

Eye Diagnostics Pro | Python, Deep Learning, Computer Vision, CNN

AI-powered retinal image classification tool supporting early identification of common retinal conditions.

- Developed an AI workflow for classifying retinal scans into Glaucoma, CNV, DME, and DRUSEN categories.
- Worked with Python, deep learning, and computer vision concepts for medical image analysis.

Baby Cry Analyzer | Flutter, Dart, Supabase, Google ML Kit

Mobile healthcare application that analyzes infant crying and provides supporting care features.

- Built a Flutter mobile application with AI-based baby-cry analysis.
- Included smart nanny sounds, medical chatbot, IoT simulation, and PDF health reports.
- Integrated Supabase and Google ML Kit within the mobile application.

AI Chatbot | Next.js, TypeScript, AI SDK, Vercel

AI chatbot application with streaming responses and support for multiple AI providers.

- Built a Next.js and TypeScript chatbot with streaming AI responses.
- Integrated AI SDK functionality and deployed the application on Vercel.

PROFESSIONAL TRAINING

Full Stack Developer Trainee | SEF Academy | Apr 2025 – Jul 2026

- Built 4+ full-stack applications in team projects, including the graduation ERP project.
- Implemented authentication, role-based access control (RBAC), and PostgreSQL triggers.
- Worked with Git, GitHub, and Docker in an agile team environment.

PROFESSIONAL EXPERIENCE

Technical Sales & Network Installation Assistant | Network Solutions Company — Egypt | 2025

- Sold networking equipment and assisted with installing and configuring networks for clients.
- Gained practical knowledge of network hardware, cabling, and on-site technical support.

Sales Representative | El-Rahma Company — Shebin El-Kom, Monufia | 2024 – 2025

- Managed customer accounts, followed up on orders, and worked toward monthly sales targets.
- Developed communication and negotiation skills through daily client interaction.

Cost Accountant | Border Guard Hotel (Hars El-Hodoud) — Al-Maza, Cairo | 2023 – 2024

- Prepared and reviewed cost reports for hotel operations and tracked expenses against budgets.
- Handled daily accounting entries and reconciled supplier invoices and inventory costs.

EDUCATION

Delta Technological University | B.Sc. in Information Technology, Software Specialization | 2022 – 2026 | GPA: 84.20%

ADDITIONAL INFORMATION

Military Status: Temporary Exemption

Languages: Arabic (Native), English (Intermediate – B1)
